ORIGINAL SPARE PARTS

WITH SERVICE PLUS

„A machine is only as good as the service behind it!“

Ferdinand Doppstadt

The positive effect on your machine of regular service and using Doppstadt genuine spare parts will become obvious from day to day use and from its high resale value. Make sure your machine is available a high percentage of the time and is therefore cost-effective.

The Doppstadt family business doesn't just build reliable and

durable machines but also offers you perfect service and first-rate genuine spare parts. Our many years of practical experience and expertise in environmental engineering means that at all times we can provide you with advice and support that is individually tailored to solve any problem.

WE KNOW WHAT REALLY COUNTS.

GOOD IF YOU CAN RELY ON SOMETHING.

Innovative engineering and intelligent service – your Doppstadt genuine spare parts service offers one-stopshopping. The service technician who comes to your business, the spare parts specialist who knows what you need. Together we form a strong team to provide you with the speediest support throughout the year wherever you are- you can rely on that.

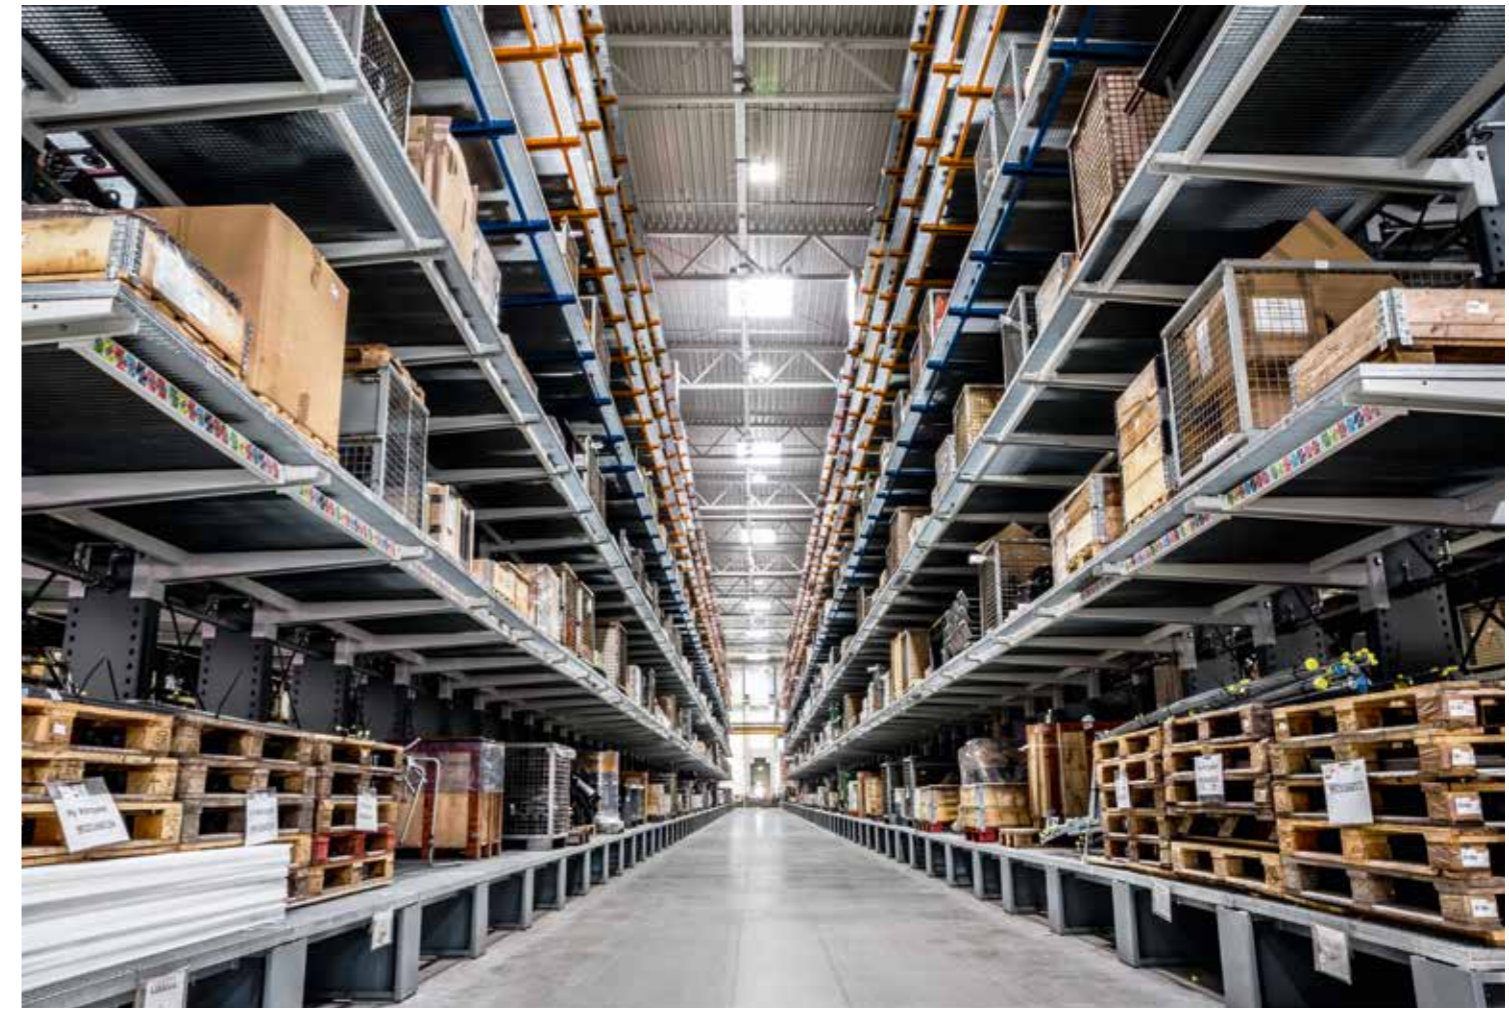

WE THINK AND ACT JUST LIKE YOU. We think Our service technicians handle Doppstadt genuine spare parts of the highest quality. Technical expertise and our knowledge as manufacturers make us specialists in spare parts. But we can do even more than that: With our special empathy for your work and everything

it involves, we are here to help you in any practical way we can. Providing one-on-one advice and always being there to lend our customers a listening ear is what a close customer relationship means to us.act just like you.

Your Service Plus

- High daily output due to high availability of machines
- Longer useful life because material quality is precisely adapted to the intended use
- Optimum quality of tools provided by using steel with the best wear properties and high-grade raw materials from European suppliers
- High operational safety achieved by stringent carbide specifications and intense production-related controls
- Legal security and maintenance of the manufacturer's product liability via patent-protected spare parts and preservation of machine's CE labelling

HIGHEST LEVEL OF LOGISTICS

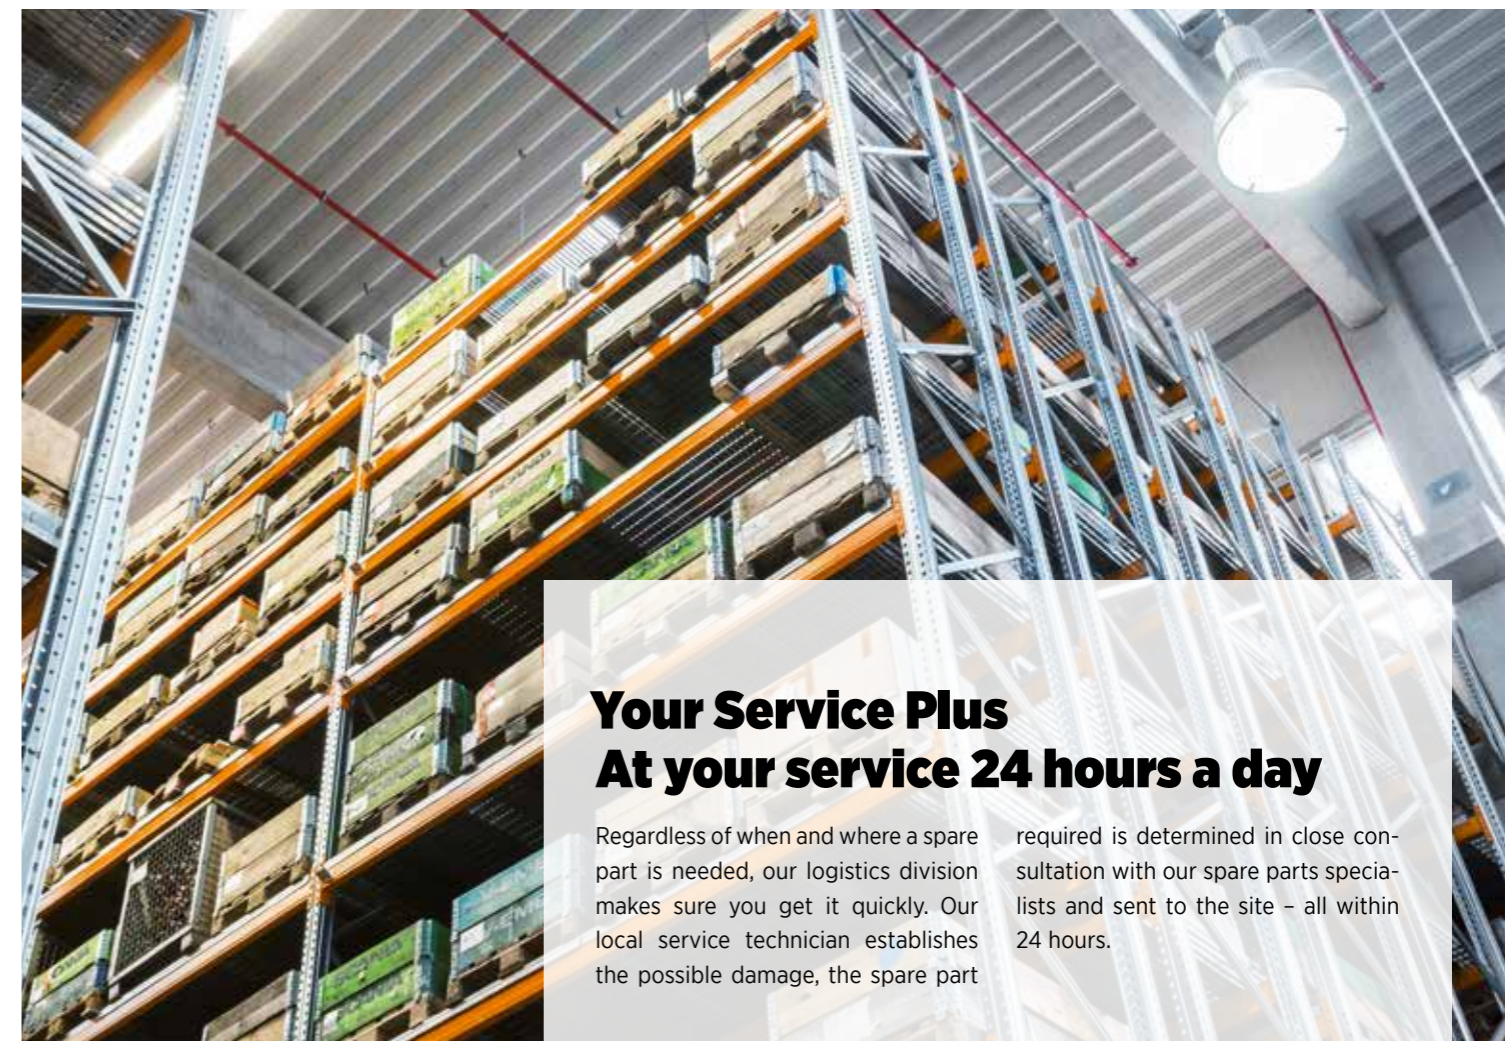

Our customers know they can rely on us. Our central warehouse in Velbert is the basis of our logistics concept.

Modern inventory management systems help our staff so that your order is processed and shipped out as quickly as possible. When we send out our ge-

nuine spare parts we collaborate with international logistics professionals to make absolutely sure that our products reach you. Our large-span stockroom is equipped with the most up-to-date storage technology and automatic shelving and shuttle systems. Our large-scale warehouse is fitted with state-of-the-

art warehousing technology and automatic racking and shuttle systems. The warehouse offers approx. 3,700 pallet racking bays and approx. 2,500 small part shelving bays in the electronically controlled picking system.

BECAUSE YOUR TIME IS PRECIOUS!

Your Service Plus At your service 24 hours a day

Regardless of when and where a spare part is needed, our logistics division makes sure you get it quickly. Our local service technician establishes the possible damage, the spare part

required is determined in close consultation with our spare parts specialists and sent to the site – all within 24 hours.

MANY GOOD REASONS FOR BUYING DOPPSTADT GENUINE SPARE PARTS

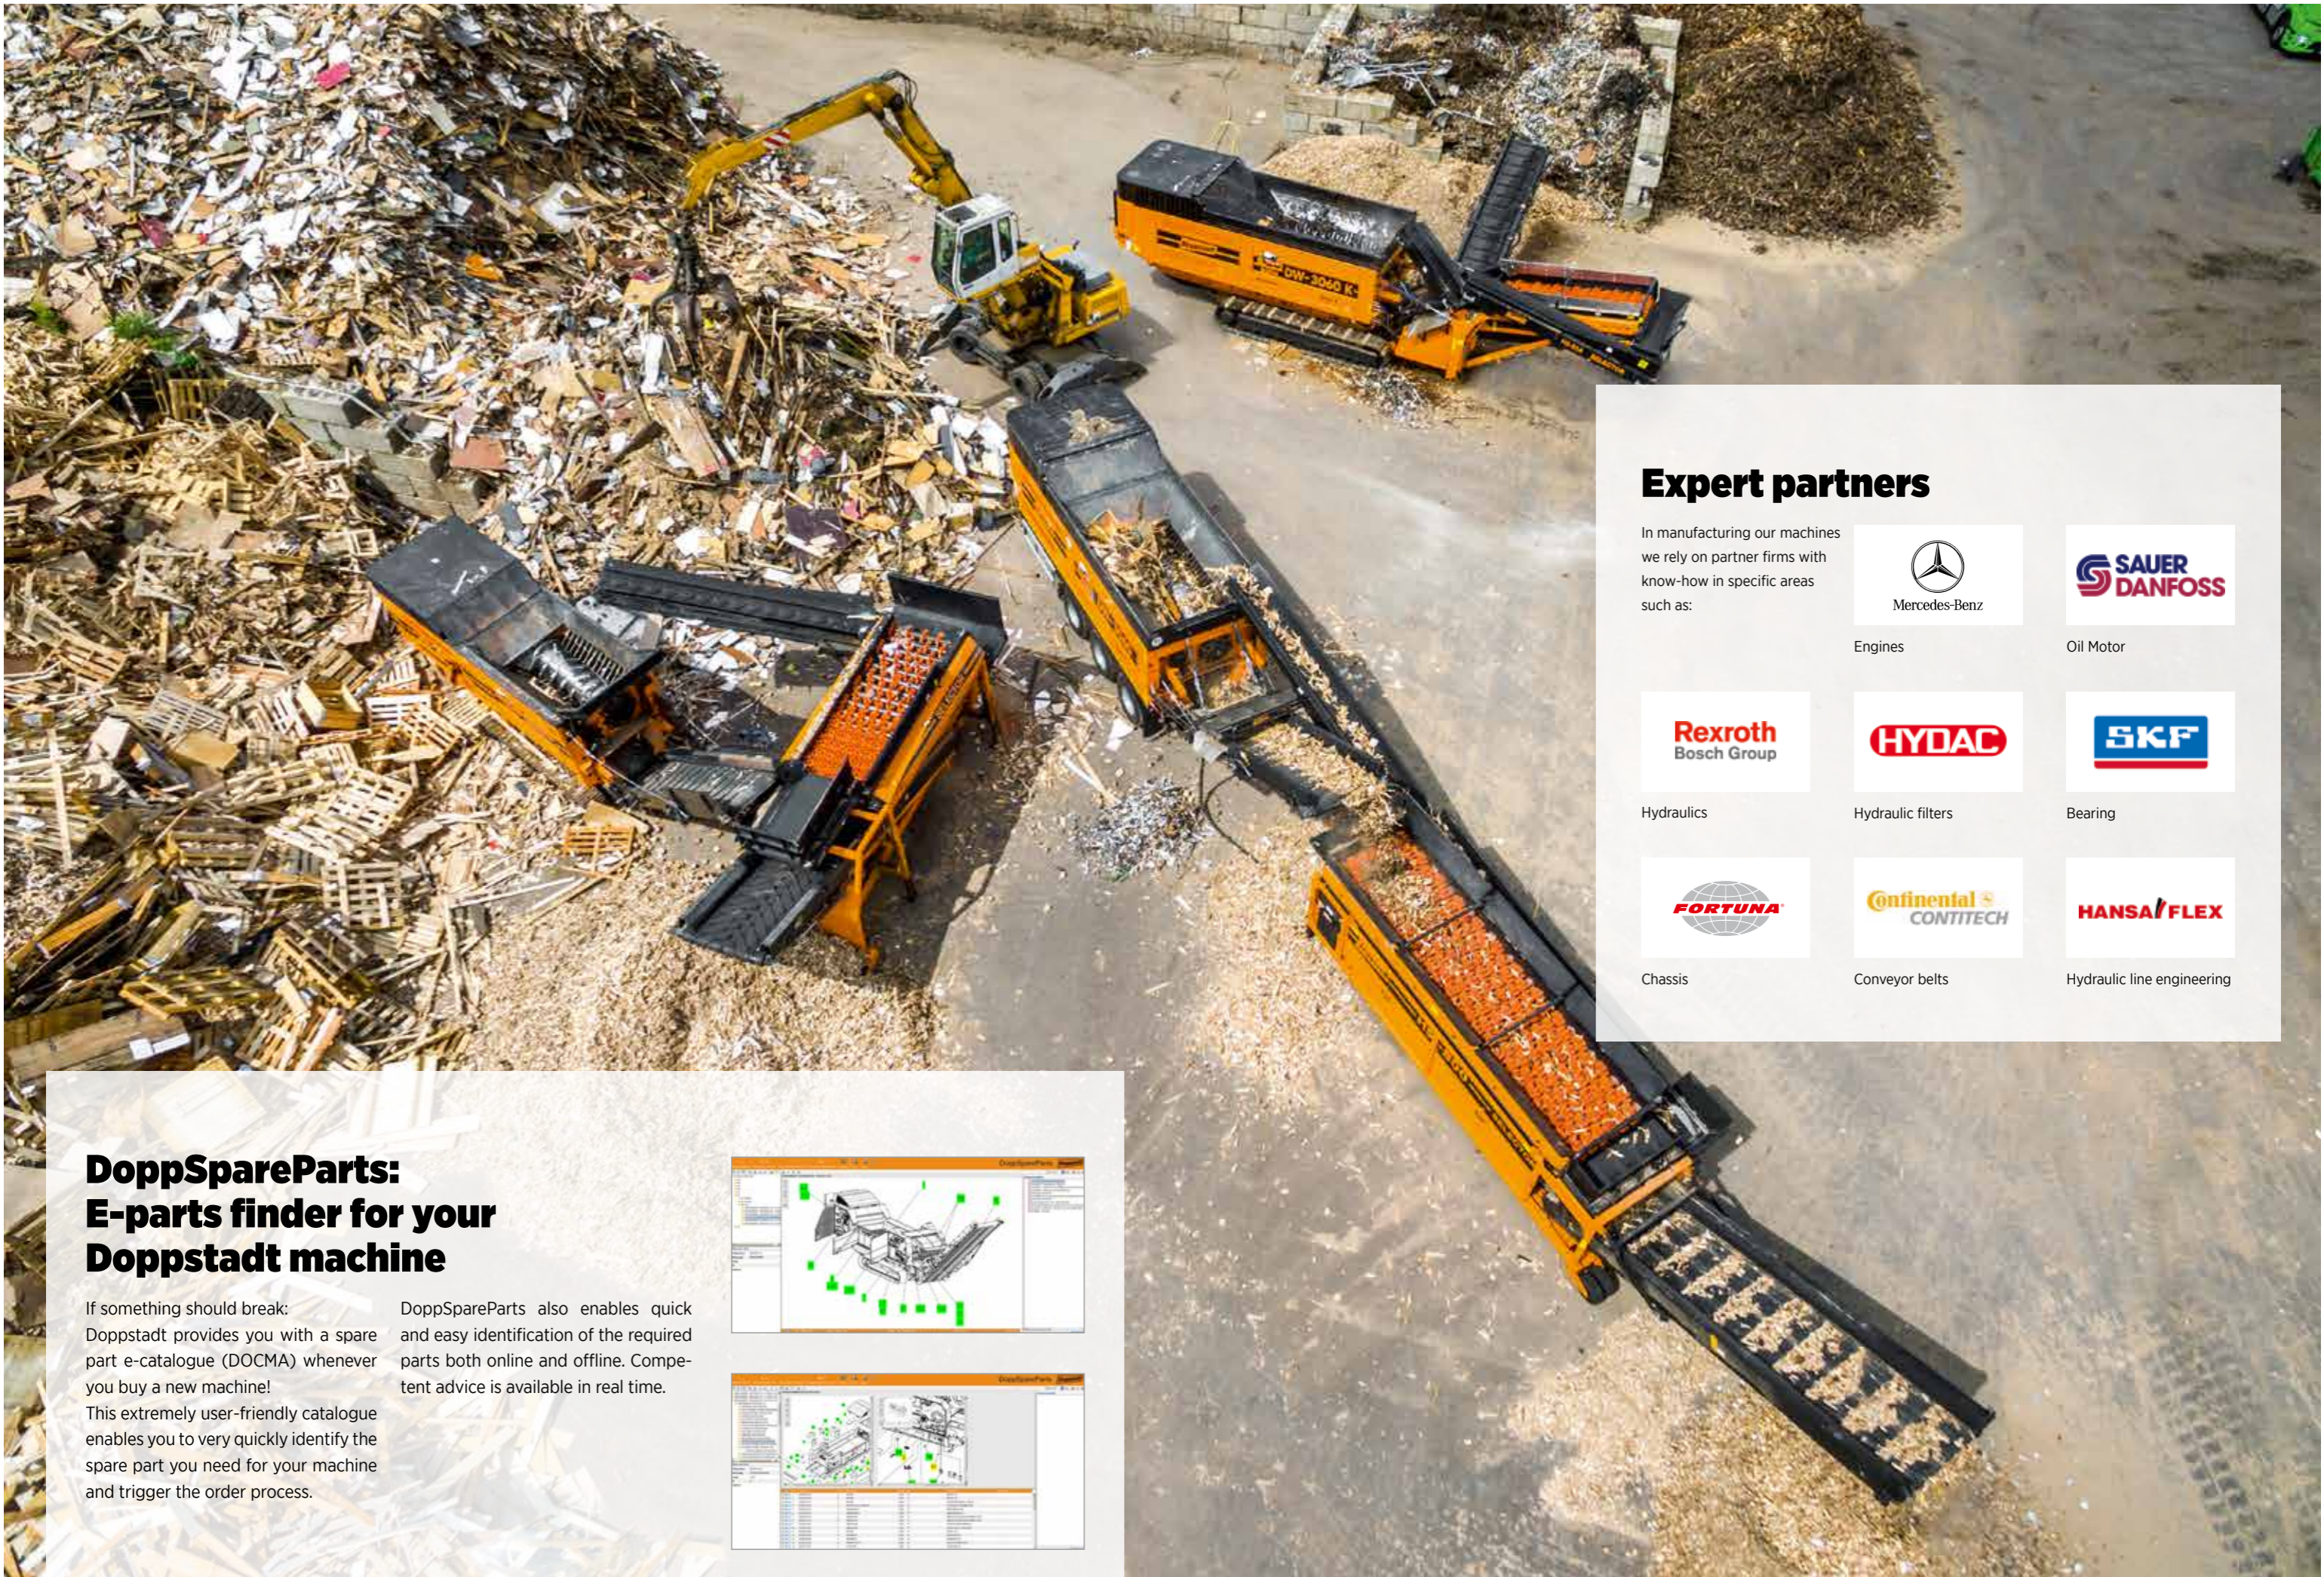

Assurance only comes if you have the genuine article. Professionals opt for Doppstadt environmental engineering because the most important things for them are maximum performance and minimum cost.

Because we know that, our spare parts are always developed to be state of the art and are patented. That's why you will find a Doppstadt label on each of our genuine spare parts. Our spare parts are custom-fit,

high-quality series production parts from the most up-to-date production lines, and are subject to ongoing quality controls. Our passion for precision is reflected in our high-quality series production. Doppstadt genuine spare parts are manufactured using high-speed, high-precision machining with our 5-axe CNC-machining centre.

The result is high-precision components with surfaces that are of an appreciable

high quality. The success of our products is shown by the competition. Doppstadt innovations very soon find themselves being imitated by other manufacturers. If you look more closely though, it turns out again and again that the copiers lack the developer's technical expertise. Even parts that look the same are often different. Sometimes they are only minimal variations in dimension but these variations can determine success or failure when the machine is used.

Expert partners

In manufacturing our machines we rely on partner firms with know-how in specific areas such as:

Mercedes-Benz

Engines

Oil Motor

Hydraulics

Hydraulic filters

Bearing

Chassis

Conveyor belts

Hydraulic line engineering

DoppSpareParts: E-parts finder for your Doppstadt machine

If something should break: Doppstadt provides you with a spare part e-catalogue (DOCMA) whenever you buy a new machine!

This extremely user-friendly catalogue enables you to very quickly identify the spare part you need for your machine and trigger the order process.

DoppSpareParts also enables quick and easy identification of the required parts both online and offline. Competent advice is available in real time.
